DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because the abstract should be limited to single paragraph (appears to be three paragraphs) and language such as "means" should be avoided. Correction is required. See MPEP § 608.01(b).

Claim Objections

3. Claims 4-17 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should not depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3672

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Great Britain reference #2,236,716. GB '716 discloses a marina/arrangement of floating mobile systems for moving mooring booms P2, wherein vessels may move between at least two adjacent booms and the other spaces between booms are closed. The arrangement comprising means for fixing booms, means which are arranged on the two ends of the system and enable the system to be attached to an identical system, means P4 for translationally guiding consisting of a pile or dolphin, and means which translationally move the booms.
